Download a free sample of any of our exam questions and answers

- ✓ Online Test Engine: Online Tool, Convenient, easy to study. Instant Online Access. Supports All Web Browsers.
- ✓ PDF format: Easy to read and print learning materials, our products are available in PDF file format.
- ✓ Desktop Test Engine: Installable Software Application. Simulates Real Exam Environment. Practice Offline Anytime.

Security & Privacy

We respect customer privacy. We use McAfee's security service to provide you with utmost security for your personal information & peace of mind.

365 Days Free Updates

Free update is available within 365 days after your purchase. After 365 days, you will get 50% discounts for updating.

Money Back Guarantee

Full refund if you fail the corresponding exam in 60 days after purchasing. And Free get any another product.

Instant Download

After Payment, our system will send you the products you purchase in mailbox in a minute after payment. If not received within 2 hours, please contact us.

Valid Certification Exam Dumps Materials and Study Guide -

Lead2Passed

Exam : **C2090-310**

Title : IBM PureData System for
Transactions - Administration

Vendor : IBM

Version : DEMO

NO.1 The Database Performance Monitor will automatically perform which task?

- A. Schedule automated table reorganizations.
- B. Capture historical performance metrics for comparison.
- C. Perform RUNSTATS on tables to provide updated statistics.
- D. Inspect tables for evaluating possible compression candidates.

Answer: C

NO.2 What is the correct procedure to allow user eric SECADM access to the SAMPLE database in the db2sdin instance?

- A. Log onto the System Console, add userid eric. Once completed, select the user from the list and grant "Administrators" rights to this user.
- B. Log onto the System Console, add userid eric. Once completed, select the user from the list and grant "Workgroup resources administration" rights to this user.
- C. Log onto the Workload Console, open up the list of instances. Highlight the instance db2sdin and add user eric and set its group to g_sysadm. This will implicitly grant SECADM to all databases under the instance db2sdin.
- D. Log onto the Workload Console, open up the list of databases. Highlight the database SAMPLE and add user eric. Then log onto one of the instance hosts (or use Data Studio) with proper access to grant SECADM on SAMPLE to user eric.

Answer: B

NO.3 What do Database Patterns help capture?

- A. Historical data
- B. Real time statistics
- C. User access information
- D. Configuration best practices

Answer: D

NO.4 Which is a valid opportunity that can result from a storage monitoring job run?

- A. Change page size recommendations
- B. Table space merge recommendations
- C. Backup compression recommendations
- D. Drop seldom-used index recommendations

Answer: C

NO.5 Which statement about a DB2 pureScale instance in a PureData System for Transactions is true?

- A. DB2 pureScale instance can never span both chassis.
- B. DB2 pureScale instance can always span both chassis.
- C. DB2 pureScale instance can span only in large configuration.
- D. DB2 pureScale instance can span both chassis if the required number of compute nodes are available.

Answer: A

Reference: <http://www.redbooks.ibm.com/redbooks/pdfs/sg248018.pdf>

NO.6 Which state indicates that a compute node will not accept any new database connections, but the current connections on the compute node will continue to run?

- A. Available
- B. Quiesced
- C. Discovery
- D. Maintenance

Answer: A
